Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of

information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Global Business Identifier (GBI)

OMB Number: 1651-0NEW

Form Number: N/A

Current Actions: This is a new information collection.

Type of Review: New Information Collection

Affected Public: Businesses

Abstract: U.S. Customs and Border Protection (CBP) is launching a Global Business Identifier (GBI) Evaluative Proof of Concept (EPoC) which aims to determine a single identifier solution that will uniquely discern main legal entity and ownership; specific business and global locations; and supply chain roles and functions. Entry filers must signal their intent to participate in the GBI EPoC, by email as discussed in the *Federal Register* notice announcing the test, and must obtain and submit (or indicate that they are in the process of obtaining) all three GBI identifiers for their shippers, manufacturers

and sellers, as part of their email. The identifiers provide additional information about trade entities and supply chain locations associated with U.S. imports, to CBP for enrollment into the GBI EPoC and, if selected, during the Entry process. The three identifiers are:

- Legal Entity Identifier (LEI) – managed and made available by the Global Legal Entity Identifier Foundation (GLEIF)
- Global Location Number (GLN)– owned and managed by GS1
- Data Universal Numbering System (DUNS) – owned and managed by Dun & Bradstreet (D&B)

GBI EPoC participants will also provide applicant information: company/entity legal name, legal entity headquarters and/or manufacturing site address, business phone number (associated with provided address), company website, Manufacture/Shipper Identification Code (MID), and Authorized Economic Operator (AEO) identification number (optional).

Automated Broker Interface (ABI) filers (including brokers and self-filers) will be required to complete a GBI enrollment process, via ABI, prior to submitting the identifiers on an electronic entry (CBP Form 3461). Filers are responsible for the associated costs to obtain all

three identifiers and will submit each identifier for the following supply chain roles:

- Manufacturer / Producer (required)
- Shipper (required)
- Seller (required)
- Exporter (optional)
- Distributer (optional)
- Packager (optional)

Section 484 of the Tariff Act of 1930, as amended (19 U.S. Code 1484) and part 141, Code of Federal Regulations, title 19 (19 CFR part 141), pertain to the entry of merchandise and authorize CBP to require information that is necessary for CBP to determine whether merchandise may be released from CBP custody. Provisions of the U.S. Code and CBP regulations, in various parts and related to various types of merchandise, specify information that is required for entry. For reference, part 163, Code of Federal Regulations, Title 19 (19 CFR part 163 appendix A) refers to a wide variety of regulatory provisions for certain information that may be required by CBP.

By testing the identifiers CBP will take its first step in determining whether to amend regulations to mandate the GBI solution. Furthermore, CBP will understand the utility of collecting and/or

combining the identifiers' data and will be able to make an informed decision on whether to mandate the use of the GBI solution as an alternative for the Manufacturer/Shipper Identification Code (MID).
